ÁÁÁ 1996-2014, Amazon.com, Inc. or its affiliates Looking for some Total War: Warhammer 3 tips? In a lot of ways this is the most challenging game of the series, since throughout the main campaign you're expected to invade the daemon realms and throw down the gauntlet to each of the Chaos gods' four princes, besting them in battle to claim their souls for yourself.But while you're absent on your merry excursion through hell, marauding Chaos armies and insidious agents spill into your realm in the hopes of bringing ruin to your faction. So, it's a delicate balance: to hold onto what you have, but also to expand, and build up your economy and settlements, so the next time you face a daemon prince, you can bring a killer army with you.In this Total War: Warhammer 3 tips I'll offer some advice that served me well in the campaign, and a few advantages you can use for yourself to help make it through the daemonic onslaught relatively unscathed. If you want to find out how the campaign works yourself, you may want to steer clear, as this guide will spoil the main story mode.Expand earlyEarly expansion is an important part of any strategy game, but in Warhammer 3 you have a limited amount of time before the Chaos Rifts appear and start spewing armies and daemonic agents into your provinces. This happens around turn 35-ish, and when it does you have to go on the defensive, especially as your faction leader's army has to head off to the Chaos Realms to grab themselves a daemon prince soul.Even after the rifts are closed, the time between them appearing gets shorter and shorter as the campaign continues. The longest period of uninterrupted expansion you get are those first 35 turns, so it's important to make haste while the sun shines and spread yourself far, before folding back in to deal with the rifts and consolidating. Expansion also helps deter potential invaders. If you defeat the Baersonling as Kislev, for example, you can stop Nurgle and Khorne from establishing a foothold to the north of you. The same goes for CathayeÁÁÁtake territory to the south in the Mountains of Mourne, and you can check demonic expansion from the Chaos Wastes to the west before they make it into your heartland. Finally, early aggressive expansion lets you deal with internal threats, like Greenskins, Ogres, and Skaven, who might become a hindrance when you're trying to deal with the rifts.(Image credit: Creative Assembly)Claim ^The Dark Prince's Paramour^This bribe from one of the gates in Slaanesh's realm is well worth sacrificing the opportunity to get a daemon prince soul for if you grab it when the first rift opens. The +25 control that it provides allows you to expand into Chaos corrupted territory without having to deal with rebellions, and after the non ,eruttarf el ereduilh ehcna onosop elaicifitra aznegilletni id iticrese ilg erneM ,enoisnapse llus llrartecnoc id itodnetemrep ,erappa aneppa non aruttarf ingo ereduilh retpod ad odom ni ybdnats ni itreva id e iore id opparg nu erartsedda id oilginoC it ,ilimis ihgoul ni erpmes onoiappa itnemmarf i ©ÁncioP ,lreduilh id amirp onacifirev is ehc icainomed itnega ilg ititut etnemadipar erref o erainissassa rep itasu eresse ehcna onosop iore iout I ,oro 005.I id muttat anu otsoc nu rep lreduilh rep eore nu orasu ocolog ^Aip otlom ^Á ,eruttarf el onorpa is ehc atlov ingo itrof ^Aip onatevid iticrese itseuq ehc otnemom lad aM ,velsik rep enzovod al eravittoc rep odom otito nu ^Á ehc ,aigattab aloccip anu odnettahmoc e arutaccaps al noc odnegaretni oticrese nu noc olraf iouP ,elbissop amirp li lreduilh itersvod ,enomel led onger nu a otassap ^Á enoizaf alled redeal out li e aicnivorp aut allen onatnups soac led itnemmarf isoiditsaf ieuq ecnoseereH noc stfIR soahC esolC javitaerc aelbmessa ,enigammi id otiderC ,onah emina etnaug atropmi non ,angapmac alled appam allus oirasreva nu aicaihcs es ,ertloni ,elgruN e enrohK emoc jvititepmoc ^Aip ingir ien ecniv ihc ediced :oseroM etnemlibaborp ^Á ,itrepa onos itnemmarf i odnauq isrednapse da eraunitnoc onisrep e etnetop oticrese nu erenetsos id odarg ni enoizaf etrof anu odneva ,angapmac al onacniv ecnirP nomeaD led sluoS el enebbes ,et id amirp orttauq e ititut onognetto es oirasreva ortla nu eraccolb id Átinutropo^1 iah ehc otnemom lad ,amina nu eracifircas eneb ehcna aV ,angapmac amirp aut al Áreiznetop ehc oiggetnup etnetop ortla nu o otnemaibmac id ozep emrone nu erednerp eqnumoc ioup am ,et rep erirappa non ebbertop elacna^1 ,ilausac onos ollecnac led imerp i ehc otnemom laD ,elaiznenopse odom ni erecserc a itodnatuia ,icimonoce icifide de etelpmoc inoigiraug erurtsoC ,otnemaidesni id enatc eut el eranroigga rep etneiciffus ^Á Ád it ehc oraned li ,ottorroC Áras oirotirret id occas nu ,itnemmarf i onarbmesS especially alert, so if you have an ally you're going to confederate and don't want them to come with chaos before you do, be a good neighbor and close their rift for them. Instead of costing money, they cost faithful, a resource that accumulates over time, or earn earning Allied missions on the war coordination screen. While you are allowed only four Allied units per army, it offers you additional recruiting, as it has its own separate capability. Like Regiments of Renown in the other games, this gives you a global means of fast recruiting that helps you fill an army and is also essentially free. Also you can create some pretty powerful combo. There's nothing like a Cathay missile army with a dwarf infantry front. (Image credit: Creative Assembly) Missile units are stronger than everJust as the High Elves are powerful in part due to their relatively inexpensive but powerful missile units and hybrid archers, so are Cathay and Kislev. Most of the other factions, except Tzeentch, are more focused on missile, so missile superiority is extremely effective, taking down infantry before it hits the front line and firing on individual entities or monsters in oblivion. Kislev's remote kossars in particular offer great value, considering that their spear variant costs about 60 gold less maintenance than the Lothern Maritime Guard base, the equivalent of the High Elf. Considering Katarin's 50% reduction in maintenance for the Archer/Melee Ice Guard hybrid, and Miao Ying's 50% reduction in maintenance for the entire missile infantry, it's possible to create incredibly strong, low-cost armies against which the Demons, Orcs, and Chaos factions fight most of the time. They both have very strong artillery, like Little Grom and Fire Rain Rocket.
